

NOMAD DUFFLE

The Nomad Duffle range is packed full of Sea to Summit's trademark innovation, robustness and quality fit for any expedition. Featuring an easy access opening, multiple carry modes for versatility, and padded base and lid, the Nomad Duffle will revolutionise how expedition packing is perceived. Available in three colours with a high visibility yellow interior, the Nomad is available in 45L, 65L, 90L and 120L sizes.

Large lid

Makes packing much easier, as well as allowing fast access to gear.

Multi Function Handles

These provide 3 versatile carry options and features:

Classic, hand carry: Magnets in centre of handles keep them together when the bag is put down. Air mesh on the underside for cushioning. The handles narrow at the natural grip point for comfort.

Backpack: Padded lid cushions duffle contents against the user's back. Ladderlock buckles on the straps allow quick and easy adjustment.

Shoulder sling: Handles join together for extra length, 2 layers of cushioning for comfort. Handle straps are secured with wiregate hooks for quick adjustment of carry option.

Padded Lid and base

Protect the contents of your duffle from impact - whether you drop the bag haphazardly, or something falls on it, your gear will be secure.

Dual-zipper

The dual zipper features two rows of teeth for increased strength and puncture resistance. Fill the duffle to the top and feel confident that the zip will never pop open with rough handling. The puncture resistant feature stops thieves easily accessing your bag.

Streamlined magnetic handle keeper

Small scale magnets inside the handles keep them held together when the bag is placed on the ground. This makes it a much simpler process to pick back up when you need both hands.

External compression straps and lash loops

When your load doesn't completely fill out your duffle, compress it down. The ladder lock buckles are completely replaceable. Multiple attachment points make it simple to attach to a yak, bus roof or motorbike.

NOMAD DUFFLE

Set-up instructions and features

Quick carry: Release handle webbing to full length. Magnet in centre of handles keep them together when the bag is put down. Thin section of handles are easy to grip. Air-mesh underside for cushioning.

Comfortable portage: Padded lid cushions the user from duffel contents. Top anchor points are close together to keep handles squarely on the shoulders. Wide section of handles spread the load. Air-mesh underside improves cushioning and breathability. Ladderlock buckle on handles for easy length adjustment. Lower anchor points positioned on side of duffel improves support of load.

Transit: Great for carrying heavy loads a short distance like from the taxi to the check-in desk. Handles join together for extra length. 2 layers of cushioning. Easy length adjustment with ladderlocks

lash loops

Yak straps: multiple tie-down points for strapping your duffel to a yak, bus roof, or motorbike.

Large lid for easy packing and fast access to gear

Multi-functional handles provide 3 versatile carry options

Padded lid and base protect contents

Dual-zipper is super durable and anti-theft

High strength hooks allow quick change of handle position

Streamlined magnetic handle keeper
